

Topic/Objective: Converting Fractions to Decimals	Name: _____ Date: _____ Period: _____
--	--

Essential Question/Main Idea **What is the "Ice Cream" Method of determining the value of a fraction?**

QUESTIONS	NOTES				
How do I convert a fraction to a decimal?	<p>We are going to use the "Ice Cream" method to convert a fraction to its decimal equivalent.</p> <p>Think about it this way...the Ice Cream goes "Inside" the Freezer...the cone goes "Outside"</p> <div style="display: flex; justify-content: space-around; align-items: center;"> <div style="text-align: center;">  </div> <div style="text-align: center;">  </div> <div style="text-align: center;">  </div> </div> <p>...and divide as you would normally. (put in your decimal & 0's as necessary)</p>				
What is a decimal?	<p>A decimal is a "placeholder" that shows you what place a number is in.</p> <div style="display: flex; justify-content: center; align-items: center;"> <div style="text-align: center; margin-right: 20px;"> $5 \overline{) 3 \ . \ 0 \ 0}$ </div> <div style="text-align: center;"> <p>↑</p> <p>↑</p> </div> <div style="margin-left: 20px;"> <p>Make sure to put in your decimal and bring it straight up...then put in your 0's</p> </div> </div>				
Is there anything important about fractions that you should know?	<p>When dividing a whole into parts, all of the parts must be equal in size.</p> <div style="text-align: center; margin-top: 10px;"> <table border="1" style="border-collapse: collapse; width: 200px; height: 20px;"> <tr> <td style="width: 25%;"></td> <td style="width: 25%;"></td> <td style="width: 25%;"></td> <td style="width: 25%;"></td> </tr> </table> </div>				

SUMMARY: Write 3 to 4 sentences summarizing what you have learned about this lesson.
